About

Associate Product Manager with 4+ years of experience building B2B and B2C SaaS products, with hands-on GenAI build experience and enterprise product depth. Shipped a RAG-based contract intelligence tool, implemented a Digital Adoption Platform across enterprise products, and owned end-to-end product lifecycle across travel tech and SaaS domains. Skilled in data-driven prioritization, Agile delivery, and cross-functional stakeholder management across engineering, design, and data teams.

Experience

Codemonk

June 2023 - Present

Associate Product Manager

- Drove user onboarding improvement by implementing a Digital Adoption Platform (DAP) via browser extensions across multiple internal products for an FMCG enterprise, reducing average product learning time by **20%** and decreasing support tickets by **60%**.
- Owned 0-to-1 product development of a GenAI Contract Intelligence tool, selecting RAG over fine-tuning to handle diverse contracts ranging from 10 to 1,500 pages; collaborated with engineering on architecture scoping and shipped to production, reducing contract review time from **~3 days** to **~3 hours**.
- Built a centralized Tender Management for a renewable energy enterprise, replacing a fragmented Excel-based process, reducing manual effort by **60%** and improving cross-team tracking accuracy.
- Facilitated sprint ceremonies including sprint planning, sprint reviews, and retrospectives; scoped sprint releases based on developer effort estimates and drove outcome discussions to align the team on delivery and continuous improvement.
- Authored user stories, epics, and acceptance criteria in Jira, partnering with engineering teams to translate product requirements into development-ready specifications and reduce scope ambiguity during sprints.

FlyNava Technologies

June 2021 - Nov 2022

Business Analyst

- Defined product requirements and user flows for a web check-in module for a leading Indian airline, collaborating with UX and engineering teams to deliver an experience that reduced airport check-in time by **15%**.
- Delivered a flight booking engine for an online travel aggregator, leading a cross-functional team of engineers and designers to deliver the feature within the given timeline, resulting in a **20%** increase in successful bookings and a **15%** decrease in booking errors
- Owned end-to-end feature development for an automated fare-filing tool serving airline pricing and revenue teams, reducing ATPCO rule submission time by **~95%** — from 7 hours to 10 minutes.
- Created wireframes and user flow diagrams using Figma and low-fidelity sketches during early discovery, establishing shared design direction for engineering and design teams before development commenced.
- Defined acceptance criteria alongside product requirements and partnered with QA teams to develop test cases, ensuring each feature release met the definition of done before go-live.

Skills

Soft Skills

1. Stakeholder Management
2. Attention to Detail
3. Cross Team Collaboration
4. Documentation

Product Skills

1. Product Thinking
2. User Empathy
3. Data driven decision making
4. Wireframing (Balsamiq, Figma)
5. Market Research
6. GenAI Lifecycle management
7. SDLC
8. Prompt Engineering
9. Agile Methodology

Tools

1. Jira
2. SQL & Mongo DB
3. Figma
4. Power BI
5. Balsamiq
6. Loveable, AntigraVity, Bolt

Education

MBA, Business Analytics

2019-2021

CMS Business School, Jain University, Bangalore, Karnataka

Bachelor of Commerce in Accounting

2016-2019

MS Ramaiah College of Arts, Science & Commerce, Bangalore University, Bangalore, Karnataka
